Green Valley Recreation, Inc. CONSOLIDATED FINANCIAL STATEMENTS

The accompanying pages are the Financial Reports for April 30, 2021. The four statements are:

Statement of Financial Position.

This is also known as a Balance Sheet or the Statement of Net Assets.

Statement of Activities

Also known as an Income and Expense statement. This report shows the types of Income, the categories of expense and the unrealized Investment Market changes for the year to date. The bottom line in this report is the net for all the reserve accounts maintained by GVR.

Statement of Changes in Net Assets

This report displays the financial activity of the four reserves that make up the Net Assets of Green Valley Recreation. These reserves are:

Unrestricted - These net assets include the Fixed Assets (land, buildings and equipment), undesignated current assets less the current liabilities and deferreed revenue items.

Emergency - Designated by the Board of Directors, this reserve is held to provide liquidity when needed for operational emergencies.

Maint - Repair - Replacement - designated by the Board of Directors, this reserve is the accumulation of assets in support of the Reserve Study which is mandated for Common Interest Realty Associations like Green Valley Recreation. Annual amounts are budgeted and transferred into this reserve for the purposes of the name of this reserve.

Initiatives - This reserve is designated by the Board of Directors to help with the funding for new programs that evolve from member interests and demands. Innovation in programming enables GVR to respond to member expectations.

Investment Portfolios

This report displays the market values of investments at the beginning of the year, the dollar amounts of changes that occurred from January 1st to the date of the financial statements. The unrealized gain or loss on market value changes is shown on a separate line to result in the market value of investments as of the reporting month end. The investments related to each of the Reserves (Unrestricted and Designated) are included in separate columns.

Presented By: David Webster,

Consent Agenda: No

Director of Accounting

Originating Committee / Department: Finance

Action Requested: Discuss and consider future approval of an accounting calculation to determine the financial surplus/loss from GVR operations at year end.

Strategic Plan Goal: NA

Background Justification: In past years there have been differences of opinion on how to determine if a surplus or loss from operations exists at year end. Establishing this Board-approved calculation will ensure that the surplus/from operations will be developed on an accurate and consistent basis.

Independent CPA, Susan Vos, will present her recommendation on the calculation, which is based on Generally Accepted Accounting Principles (GAAP), and her recommendation on presenting material, such as the Budget document and quarterly financial reports, on a cash basis.

Fiscal Impact: None

Board Options:

- 1) At the next regular Board meeting, accept and approve Susan Vos' recommendations for calculating the year end surplus/loss, as presented in the accompanying documents.
- 2) At the next regular Board meeting, approve a different calculation for determining the year end surplus/loss.
- 3) Provide different direct to staff.

Staff Recommendation:

Operating Surplus Calculation

At the end of each fiscal year, the Board of Directors shall determine the amount, if any, to contribute from operational surpluses. Operating Surplus or deficit is calculated as follows:

- a. Begin with the Change in Net Assets from the Audited Financial Statements
- b. Deduct unrealized gains/losses on operating accounts,
- c. Deduct net investment income on reserve accounts/investments
- d. Add depreciation expense
- e. Deduct current year purchases of Capital Assets (cost basis, before accumulated depreciation)
- f. Add reserve cash amounts that were used to purchase Capital Assets
- g. Add expenses that were paid using reserve cash (i.e. repairs and maintenance expenses paid for using MMR funds)
- h. Deduct funding cash transfers to reserve funds during the year (i.e. required MMR funding)
- i. Add or deduct any other non-cash items (i.e. in-kind capital donations)

The intent of the calculation is to determine if there is a surplus of operating revenue over operating expenses each year that can be transferred to a reserve fund. The calculation is to remove non-cash items such as depreciation and unrealized gains/losses. Additionally, adjustments are to be made to take into consideration operating cash used for Capital Asset purchases. Reserve fund cash used to pay for Capital Asset purchases and operating expenses should not be included in the operating cash surplus.

RE:

Major Assets Replacement (MAR) Fund

In June 2020, the FAC committee recommended that GVR work towards establishing a Major Assets Replacement (MAR) fund for ageing fixed assets that are not included in the current Maintenance Repair and Replacement (MRR) fund. This decision was prompted by the experience of addressing the East Center pool that was closed down due to a leak coupled with the fact that there are several pools that have been in service for a significant amount of time. Since the MRR does not include major fixed assets such as pools and buildings, FAC wanted staff to discuss with Browning & Associates, the options for establishing a study and a fund to address this need. In general, Robert Browning, with Browning Associates, indicated it is entirely up to GVR whether we expand the study and create a fund for Major Assets.

The FAC and IC are now asking staff to make a recommendation on the matter. The following recommendation will incorporate the \$380,201 actual surplus from 2020 and a \$169,553 line item that was included in the 2021 Budget for MAR. The simplest and most straightforward approach would be to simply define and add the Major Assets to the current Reserve study. Staff estimates that this would increase the annual contribution to the MRR reserve by \$250,000 to \$350,000 per year. The 2020 surplus and 2021 budget would cover a total of \$549,754. This would be the easiest method.

However, given the environment of the Board, and the Board's desire to track funds separately, Staff also believes that it would be more useful that the funds for this MAR fund

be held in a separate investment account. To do this, Browning would have to segregate the MAR projects from the regular MRR projects in the report. Annual contributions would be deposited separately to each account. The MAR Reserve Account could have its own Investment Policy Statement and earnings would be credited to the account and disbursements would be issued directly from the MAR account much like they are currently being issued from the existing reserve accounts.

Since the Reserve Study is now being updated by Facilities, it is a good time to initiate the following process:

- Request Facilities Department recommendations for the MAR.
- Work with Browning to define the scope of the MAR (pools, spas, building).
- Discuss with Browning the options to consolidate or separate the MRR and MAR in one study.

The intent of this memorandum is to move the process forward in the best manner possible.

Overview

The goal of this presentation is to provided an analysis of the growth in GVR personnel expenses to determine the rate of growth. The following analysis is based on audited expense amounts.

Total Expenses

GVR analyzes expense increases in 3- and 5-year increments and they are as follows:

TOTAL EXPENSES:		Remove CEO Contract Buyout							
	Total	Annual	Total	Annual	CPI				
3 Year increase (2017-20)	10.3%	3.4%	<u>6.5</u> %	2.2%	<u>7</u> %				
5 Year increase (2015-20)	26.5%	5.3%	<u>22.2</u> %	6.5%	9%				

In 2014, GVR initiated a concerted effort to move GVR from a simpler and more informal business to a more professionally managed organization which included hiring additional staff and initiating an MRR study. A 6-year analysis (2014-2020) is as follows:

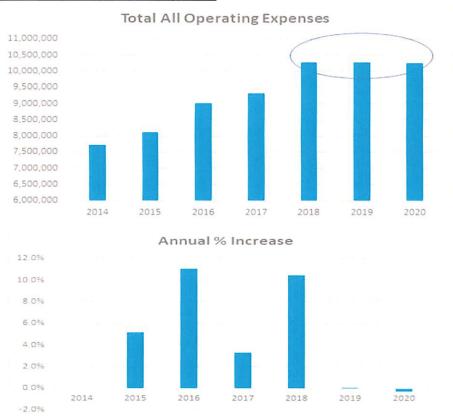

Remove CEO Contract Buyout

	Total	Annual	Total	Annual	CPI
6 Year increase (2014-20)	33.1%	5.5%	28.6%	4.8%	10%

The personnel expenses have grown 28.6% when the CEO Contract Buyout is removed. The grand total increase is 33.1%

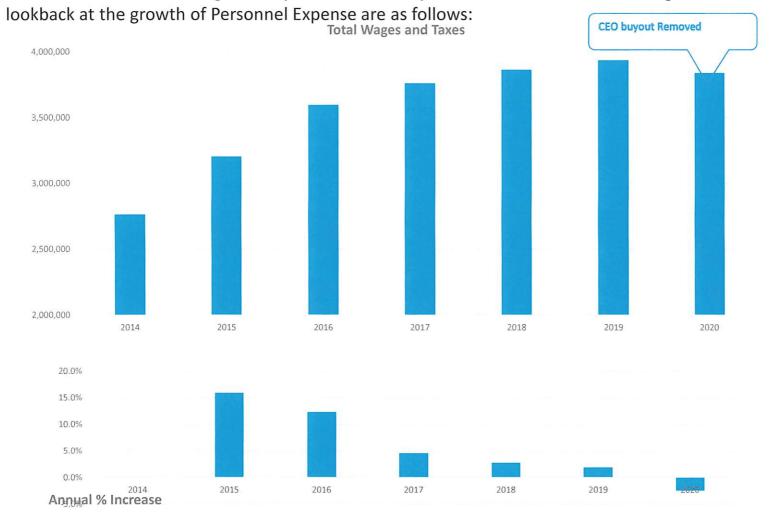

Total Expenses

The following graphs illustrates GVR TOTAL expense trends and supports the fact GVR purposely advanced to a professionally managed organization in 2014 and, after having done so, the expenses have remained essentially flat:

Personnel Costs

Personnel Costs are the largest component of GVR expenses as is the case in most organizations. A 6-year

Summary

In 2014, GVR intentionally moved to a more professionally managed organization which included hiring additional staff and initiating an MRR study.

GVR expenses are now 28.6% more than they were in 2014.

Now that GVR has transitioned to the MRR plan, the Total expenses have grown 6.5% over the past three years compared to 7% inflation.

GVR Personnel costs over the past three years have increased 6.3% compared to 7% inflation.

The current trend of increases in total expenses and personnel expenses are reasonable when compared to inflation.

GVR will continue communicating expense trends to Board Members and members through quarterly Financial Reports.
